Home: 54000 Lahore (Pakistan)

ABOUT MYSELF

Experienced Web Developer with more than 5 years of experience managing website and web application design projects. Skilled in creating cohesive designs and infrastructure, with expertise in REST API development for seamless data exchange. Specializes in React, Redux, JavaScript, TypeScript, Next.js, Node.js, Express, Redux, Angular, microservices architecture and REST API development.

WORK EXPERIENCE

Al-Burraq Technologies

[2025 – Current]

- Developed, tested, and maintained scalable and responsive web applications using MongoDB, Express.js, React, Next.js, Nest.js, Supabase, SQL, Postgress, GraphQL, and Node.js (MERN stack).
- Collaborated with cross-functional teams including designers, QA engineers, and project managers to deliver high-quality features on time.
- Refactored legacy code to improve readability and maintainability, resulting in a 30% reduction in bug reports and faster development cycles.
- Optimized frontend rendering and backend queries, improving application load time by up to 10%
- Introduced modular architecture and reusable components, significantly enhancing development speed and consistency across the codebase.
- Implemented caching strategies and query optimization to improve server response time and database performance.
- Debugged and resolved complex technical issues across the stack, reducing support tickets and increasing user satisfaction.
- Participated in code reviews and documentation efforts to uphold clean, consistent code standards and share knowledge across the team.
- Worked with RESTful APIs and integrated third-party services such as payment gateways and analytics tools.
- Deployed applications to cloud-based platforms (e.g., AWS, Heroku, Vercel), ensuring high availability and scalability.
- Ensured web security best practices including input validation, authentication, and data protection.

Sesimi – Melbourne, Australia

City: Melbourne | **Country:** Australia

Software Engineer (MERN STACK) on-site

[2024 – 2025]

- Develop, test, and maintain scalable web applications using **MongoDB, Express.js, React, and Node.js (MERN stack)**.
- Collaborate with cross-functional teams to design and implement **new features and enhancements**.
- Write **clean, efficient, and maintainable code**, following industry best practices.
- Debug, troubleshoot, and resolve **technical issues** in a timely manner.
- Optimize application performance for **speed and scalability**.
- Participate in **code reviews, documentation, and knowledge-sharing sessions**.
- Work with RESTful APIs, third-party integrations, and **cloud-based deployment platforms**.
- Ensure **security, data protection, and best development practices**.
- Stay updated with **emerging technologies and industry trends** in web development.

Al-burraq Technologies – Lahore, Pakistan

City: Lahore | Country: Pakistan

Software Engineer (MERN Stack)

[11/2021 – 12/2023]

Task And Responsibilities:-

1. Collaborate with teams and product managers to brainstorm software solutions.
2. Architect client-side and server-side systems.
3. Develop immersive Portals and Frontend views using React.js, Redux, Angular.js, TypeScript, Node.js, Nest.js.
4. Utilize Node.js and Nest.js for server-side development, enhancing application performance and scalability.
5. Ensure software responsiveness and efficiency through rigorous testing.
6. Debug, troubleshoot, and upgrade software as needed.
7. Implement robust security and data protection measures.
8. Utilize Node.js and Express for server-side development, enhancing application performance and scalability.
9. Work on server-side logic and database design.

Xint Solutions

Associate Software Engineer

[08/2019 – 10/2021]

Tasks and Responsibilities:-

1. Assist in developing web and mobile applications using React.js, Next.js, Node.js , Express.js and nest.js framework.
2. Write clean and efficient code following established coding standards and best practices.
3. Collaborate with senior developers, designers, and stakeholders to understand business requirements and deliver tailored solutions.
4. Participate in code reviews, testing, and debugging to maintain a high-quality codebase.
5. Stay updated with the latest technologies such as React, Redux, Express, Node.js and REST API development.

Art plus – Lahore, Pakistan

City: Lahore | Country: Pakistan

Junior Software Engineer

[10/2018 – 07/2019]

Tasks and Responsibilities.

1. Ensure that all aspects of a project are properly designed, installed, tested, and maintained. Perform troubleshooting tasks. Monitor Progress, Perform Different tests. Write reports

EDUCATION AND TRAINING

Bachelors of Science in Computer Engineering

Lancaster University [09/2014 – 09/2018]

LANGUAGE SKILLS

Other language(s):

English

LISTENING C1 READING C1 WRITING C1

SPOKEN PRODUCTION C1 SPOKEN INTERACTION C1

Levels: A1 and A2: Basic user - B1 and B2: Independent user - C1 and C2: Proficient user

SKILLS

Git / JavaScript / JSON / Github / Web Development / Postman / SQL / CSS / RESTful api / Web API / Object-Oriented Programming / API Integrations / Nest.js / JWT Tokens / JWT Auth / Frontend - (React.js, React Native) / ReactJS Library / HTML, CSS, Bootstrap / Bootstrap / Formik/Yup / React Formik / Next.js / React Hooks, React Redux / Redux Toolkit - Saga - Thunk / Redux / React, AngularJS

PROJECTS

Degree37

This application holds a special place in my heart, and it fills me with pride.

Degree37.io is an advanced web portal committed to promoting blood donor registration and proactive donor engagement. The platform simplifies blood donation procedures and encourages donor involvement, establishing a vital and efficient link between donors and recipients during critical times.

Technologies and Tools:

React.js, JWT Auth, Redux Toolkit, Cron jobs, React router, Bootstrap, Node.js, Express.js, Redux and Keycloak

Hands on experience:

Worked on the frontend portal of the project, and created reusable components with the latest industry standards, Implemented ACLs and multitenant system

Cue Health

Cue Health offers an innovative healthcare solution that empowers individuals with convenient, at-home diagnostics. Their platform provides rapid, accurate results for a range of health tests, from COVID-19 to influenza, enabling proactive and informed healthcare decisions from the comfort of your home.

Technologies and Tools:

React.js, Redux, Auth0, GraphQL, JWT Auth, React router, Chakra UI, Cron Jobs, Node.js, Express.js, MongoDB, MySQL and Formik

Hands on experience:

Worked on the portal side of the project, created reusable components, beautiful views, authentication, and ACLs

Right Farm

Is an online platform connecting farmers, suppliers, and buyers. Its microservice-based architecture includes product, catalog, user, and invoice services. The admin portal allows efficient management of products, prices, orders, and users.

Technologies and Tools:

React.js, Redux toolkit, JWT Auth, React router, Bootstrap, GraphQL, MySQL, Cron Jobs, MongoDB, Node.js, Express.js, Angular and Formik

Hands on experience:

Worked on the portal side of the project, created APIs, authentication, ACL, and microservices.

My Dog Care

MyDogCare is a comprehensive online platform designed for pet lovers and dog owners alike. With a wealth of resources, expert advice, and tools, it simplifies pet care, offering guidance on everything from training and nutrition to health and grooming, ensuring your furry friend lives their happiest, healthiest life.

Technologies and Tools:

React js, Redux tool kit, JWT Auth, React router, Bootstrap, Node.js, Express.js, MongoDB, MySQL, Jest and Formik

Hands on experience:

Worked on the portal side of the project, and amazing views, reusable components, authentication, ACL, and appointment management system.

Dubai Blocks

Dubai Blocks LLC, a leading manufacturer of high-quality concrete blocks and interlocks in the UAE, utilizes advanced German machinery for production. With strict quality control and a fleet of trucks, they deliver approved products across the country.

Technologies and Tools:

React js, redux, JWT Auth, Node.js, Express.js, MySQL and Bootstrap

Hands on experience:

Worked on the frontend and backend of the project, and created UI and integrated APIs.

CERTIFICATES

Web Defense Fundamentals
